

The S. B. Ohio No. 2, has placed under renewed obligations for Cincinnati papers.

The Cincinnati and Marietta Railroad is to be sold on the 25th inst., at assignee's sale, in Chillicothe. The liabilities of the road are about \$13,000,000.

Documents.
Hon. T. R. Stanley, of the Ohio Senate, will accept our thanks for reports of the Auditor of State, and of the School Commissioner.

Valentines.
We would recommend persons who are puzzling their brains as to what they shall send, and to whom, on this St. Valentine's Day, to read the story on the outside of to-day's paper, entitled "Mark Easton's Valentine," and "go thou and do likewise." Mr. C. E. Donnelly or J. McMaster & Son will procure you such Valentines.

The "Grey Eagle."
This favorite Pomeroiy and Cincinnati semi-weekly side-wheel packet left Cincinnati on Saturday last at 5 o'clock P. M., and arrived at our landing the next evening at about nine o'clock. We are quite certain that better time has not been made since the days of the "Old Line Boats." Thanks for late papers.

Shocking Murder.
The Jackson Standard of last week contains the verdict of the Coroner's Jury summoned to inquire into the cause of the death of James Carl, whose body was found in a coal pit, near Cross Road Station, in Jackson Co., O. The jury returned a verdict that deceased had come to his death by means of injuries inflicted by Isaac Hector, supposed to have been with an ax. Hector made good his escape.

The Concert at Racine.
The Concert of G. D. Munson's class, at Racine, came off on Tuesday last, under the direction of his father, assisted by Miss Julia. It is reported to us as being a first-class performance, and we understand that Miss Julia made quite a hit in the performance of Handel's "Angels Bright and Fair." In this piece, which she rendered at their last concert here, we were struck with the magnificent strains, and her supreme mastery of voice. May the "Munsons" ever prosper.

The School Library Question.
After the adjournment of the Republican meeting at the Court-house, on Saturday last, a meeting was organized for the purpose of ascertaining the feeling of the community on the proposed suspension of the School Library Law. Strong opposition was made to the suspension, and some, also, in favor of it, the preponderance being opposed to the suspension.

It was thought best, however, not to take any action in the matter, as the meeting had not previously been called for that purpose, and the meeting adjourned.

Good News.
The Portsmouth Tribune learns that a company of five men, non-residents of that place, have rented the new Rolling-Mill at Portsmouth, and contemplate putting it in motion soon. The advantages of the active operation of such works are truly great, and are only fully appreciated when they suspend operations. The Rolling-Mill at this place was started over a year ago, and its operations revived business generally, and gave a new impetus to trade, which has ever since been rapidly increasing. The business of a town or city can be very accurately estimated in proportion to the operations of manufacturing.

Peach Grove Nursery.
The proprietors of this Nursery, M. W. Rutherford & Co., present our readers to-day with a lengthy catalogue of different varieties of Peach trees. The object of the proprietors in collecting this selection, was to procure varieties ripening at different times, in order to lengthen the season. This is very commendable, as the Peach season is now but a week or two in length, and with this plan they propose to make it two months or more. Every farmer will at once see the advantage such a selection would be to his orchard, and we hope they will supply themselves at an early day with the varieties they may desire. Preserve the catalogue for future reference.

Republican Meeting.
The call of the Central Committee for a meeting of the "Republicans," and all others opposed to Federal corruption," &c., was responded to by a moderate attendance at the Court-house, on last Saturday afternoon. It being stated that "the object of the meeting was to select five delegates to attend the State Convention to be held on the 1st day of March, for the purpose of selecting four delegates at large to attend the Chicago Convention, called to nominate Candidates for President and vice President," on motion, Joseph F. Buffington, T. A. Plants, Thos. Fessler, E. Williamson and Cyrus Russell were appointed said delegation, with authority to cast the vote of the county, and to fill vacancies that might occur in the delegation.

It was also decided not to hold a district Convention for the nomination of two delegates from the Congressional District, but the delegation to Columbus was authorized to meet the delegations from the other counties and select the Congressional delegation.

Mr. J. V. Stevens, offered some appropriate resolutions, embodying the wholesome doctrines of the Republican party, but as the time was too limited for the meeting to consider and act on them, he asked permission to withdraw the same, which was granted.

More Evidence of the Millennium.

The Portsmouth Tribune, of the 8th inst., in quoting "corn sales," notes the fact that about 30,000 bushels of corn had been shipped to D. Gibson's distillery during the week.

The beautiful and productive bottoms of the Scioto are doing their share to hasten the "day of reckoning."

Harpers' Weekly.
This inestimable weekly pictorial newspaper, which not only contains accounts of the current events of the times, but illustrates them with true and life-like representations, has been received. We have no hesitancy in saying that it is the best pictorial weekly we know of, and cannot well conceive how a better one could be gotten up. If any person wants this paper, the back numbers of the volume can be procured, or subscriptions may commence at any time. Single number one year, \$2.50; two copies \$4.00. Harper's Weekly and Magazine one year, \$4.00.

The Weather.
Believing that we have about as much weather here as any other place in the same latitude, and as good a quality, we do not pay the attention to giving it weekly notices that many of our contemporaries do. And while speaking of this, we must make an apology to our readers for wholly neglecting to post them on the movements of the groundhog in this region on the 2d inst., and will attribute our want of observation to the fact that we leave the matter of regulating the weather wholly to other papers, and forget the day set aside to His Prophetic Majesty the "Ground-Hog." We learn, however, that he did come out, but didn't remain; therefore, according to his interpreters, we should prepare for six weeks more of winter weather.

Rare.
About five o'clock last Wednesday evening the attention of some of our citizens was attracted to the hill immediately back of town, by the baying of a pack of dogs, who seemed to be in hot pursuit of game. Directly a doe came in sight and neared the precipice, back of Rev. Trombly's residence. It was thought to be a lure of the animal to gain advantage of her pursuers. Near and nearer she approached, and the sliding being quite steep, the earth gave under its feet, and it slid part way over, hanging on by its fore legs. It was not able to draw itself up again, and in a short time was precipitated about sixty feet, among the rocks beneath. A couple of gentlemen hastened to the spot, expecting to see a mass of mangled carcase, but, to their surprise, nothing was to be seen of it. On searching, they discovered it a few paces off, standing very composedly among some shrubbery. On going toward it, it moved off as nimbly as though no mishap had occurred, skipping fence after fence. It had probably been injured internally, as it was pursued and caught by a gardener at the upper end of town. The gardener, not knowing the propensity of the animal to "strike out," was alarmed at the sudden violent blows administered to him, and gave it freedom, without further molestation.

It was caught again, however, and this time did not fare so well. It was divided among its captors, and many guests were doubtless invited to partake of the rare meat in an hour afterward.

The "H. D. Mears."
This new side-wheel boat passed down on her maiden trip, last Thursday, and yesterday morning. She is a handsome craft, with good speed, and the best of officers. On her trip down she ran from Portsmouth to Cincinnati in eight hours and twenty minutes. Coming up, she was heavily laden—about 350 tons on board—made excellent speed.

The Cincinnati Commercial, of Saturday last, (for a copy of which we are under obligations to the gentlemanly clerk,) says of her: "An attractive feature at the levee was the arrival of Capt. J. C. Jelly's new and splendid side-wheel passenger packet H. D. Mears, named after the General Agent of the Boston and Baltimore Steamship Line, and just completed at Wheeling, for the Cincinnati and Wheeling trade. She is without doubt one of the most graceful, serviceable, comfortable, and best finished steamers we have examined in a long while. Her model is easy, while she has fine speed. The hull, by Wilson, Dunley & Co., is 314 feet on deck, 34 feet beam, and 5 1/2 feet draft. She has three 5 ft. boilers, 44 inches in diameter, and 24 feet long, and two 22 inch cylinders, 7 feet stroke, driving a pair of 27 foot water-wheels, with 11 feet length of buckets—the latter being two feet in width. The cabin is finished in the most modern and elegant style, and is commodious, comfortable and luxuriant to the last degree. She is without doubt one of the most graceful, serviceable, comfortable, and best finished steamers we have examined in a long while. Her model is easy, while she has fine speed. The hull, by Wilson, Dunley & Co., is 314 feet on deck, 34 feet beam, and 5 1/2 feet draft. She has three 5 ft. boilers, 44 inches in diameter, and 24 feet long, and two 22 inch cylinders, 7 feet stroke, driving a pair of 27 foot water-wheels, with 11 feet length of buckets—the latter being two feet in width. The hull, by Wilson, Dunley & Co., is 314 feet on deck, 34 feet beam, and 5 1/2 feet draft. She has three 5 ft. boilers, 44 inches in diameter, and 24 feet long, and two 22 inch cylinders, 7 feet stroke, driving a pair of 27 foot water-wheels, with 11 feet length of buckets—the latter being two feet in width. The cabin is finished in the most modern and elegant style, and is commodious, comfortable and luxuriant to the last degree. She is without doubt one of the most graceful, serviceable, comfortable, and best finished steamers we have examined in a long while. Her model is easy, while she has fine speed.
